

Stacked bar chart showing the relative abundance of 10 fish species across five sites: Grewingk, Halibut, Jakalof, Tutka, and Wosnesenski. The y-axis represents relative abundance from 0 to 100. The x-axis lists the sites. Each bar is composed of segments representing different species, color-coded from dark purple at the top to yellow at the bottom. Jakalof has the highest total abundance, while Tutka has a distinct segment of a species not seen at the other sites.

Site	Species 1 (Dark Purple)	Species 2 (Purple)	Species 3 (Dark Blue)	Species 4 (Teal)	Species 5 (Green)	Species 6 (Light Green)	Species 7 (Yellow-Green)	Species 8 (Yellow)	Species 9 (Dark Blue)	Species 10 (Teal)
Grewingk	10	15	10	35	20	10	5	5	2	2
Halibut	10	15	10	35	20	10	5	5	2	2
Jakalof	10	15	10	35	20	10	5	5	2	2
Tutka	10	15	10	35	20	10	5	5	2	2
Wosnesenski	10	15	10	35	20	10	5	5	2	2
